

Corona Virus Social story

The Corona Virus is similar to the  
flu or the common cold.

The Corona Virus is causing  
people around the world to worry.

Lots of information is being  
shared on the news or on the TV.

But I don't need to worry because there  
are adults to take care of me.

If anyone in my house gets Corona Virus this will mean that they will have a fever and a cough. Some people might find it difficult to breathe.

But it wont last for long and almost  
everyone gets better.

While people are getting better we need to stay inside so that we don't share Corona Virus with anyone else.

To help stop the Corona Virus from  
moving between people I can help!

**20**

I can help by washing my hands with  
soap and water and count to 20.

Or I can use hand sanitizer and let it  
dry on my hands.

If I do these things I am less  
likely to get poorly.

4

The government have told me that  
I need to do 4 things.

I am not allowed to go to the  
shops with people I live with.

I am only allowed to go out the house to walk the dog for a short walk.

2m

I need to stay 2 metres away  
from people that I don't live with.

My family are only allowed to go  
out in the car if it very  
important!

While I am being looked after doctors  
are working hard to find medicine so  
no one gets poorly.
